

AL 28-W

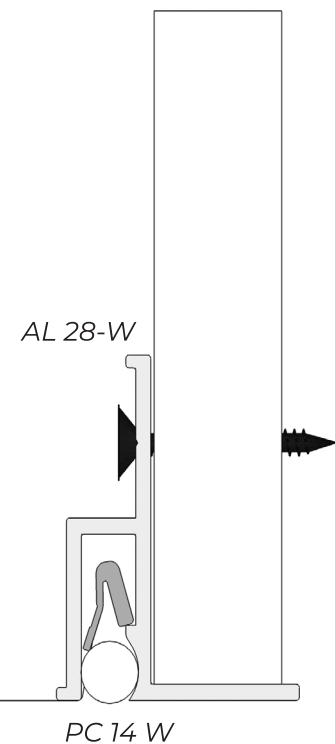

Used with MINI harpoon

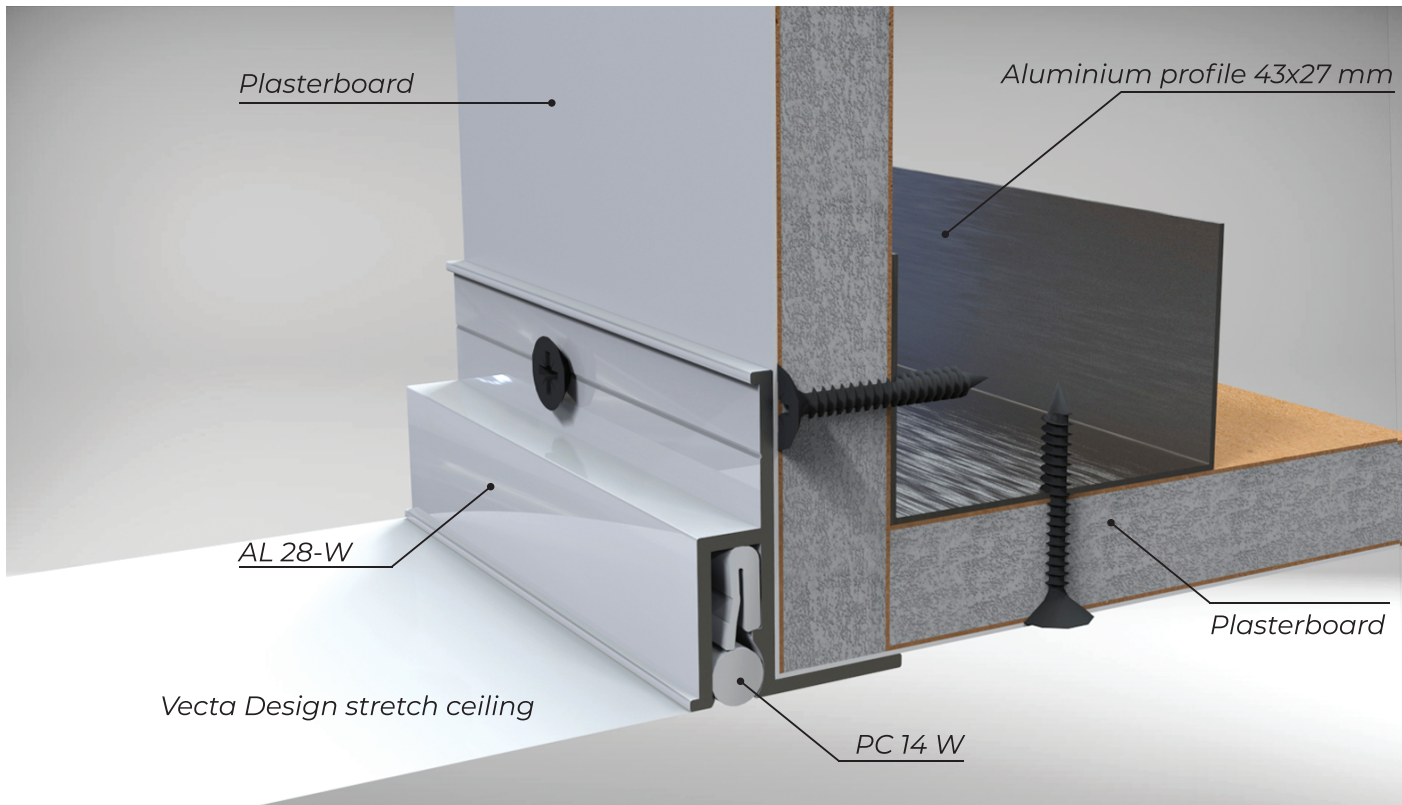

Aluminum profile AL 28-W is the classic wall profile. It was designed by Vecta Design specially for the installation of plasterboard and stretch ceiling in the way that both ceilings will be on one level. The profile allows to overlap the corner joint of the gypsum board and creates a smooth edging at the connection point.

PROFILE REAL-SIZE DIMENSIONS

Vecta Design
stretch ceiling

Elastic PVC decoration clip PC-14 W with the round cross-section was designed to mask the gap in the lock, it is very easy and convenient to use. The profile has a lock for using the MINI-harpoon. AL 28-W is colored in neutral white semi-mat RAL 9003.
